Open access in
Cultural Heritage
digital content

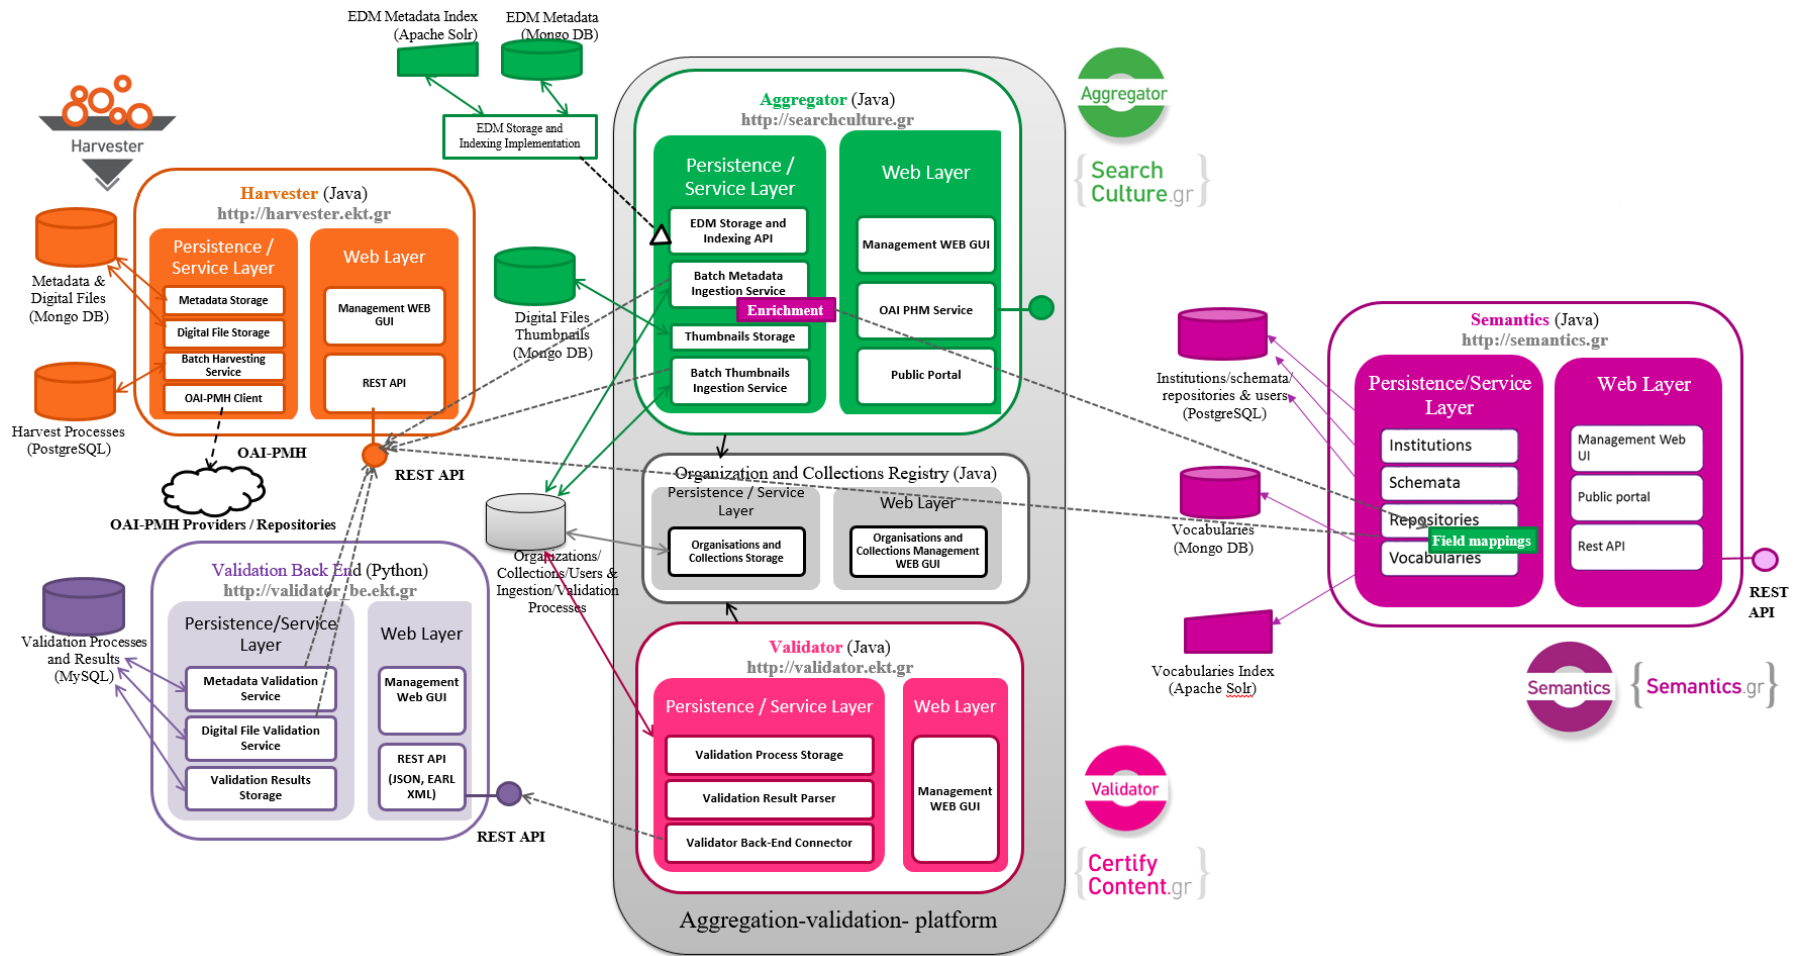

Haris Georgiadis, Ph.D.
Senior Software Engineer | EKT
hgeorgiadis@ekt.gr

The beginning ..

- **42 institutions** documented & digitalized items of Cultural Heritage & created on-line digital repositories
 - Co-funding projects by Greece and EU structural funds
- The role of EKT with respect to this content was to
 - collect it
 - validate and certify it
 - enriched it semantically
 - publish it in searchculture.gr
 - preserve it

The ecosystem architecture

harvester, aggregator (searchculture.gr),
validator (back-end & front-end),
system for enrichment (semantics.gr)

Open access in Cultural Heritage digital content

{ Search

* The classification of the content against a vocabulary of types was held by EKT

Open access in Cultural Heritage digital content

150.000+ items | 53 collections | 42 institutions

{ Search Culture.gr } Features

- **Aggregates digital content** from registered digital repositories
- **Public portal**

 Modern & effective search engine
facet queries
thumbnails

 Dissemination as Open Linked Data (Open Linked Data)

 Multilingual (English / Greek)

 Responsive design

 Rights statements per item, mostly CC, defining copyright, accessibility and reusability status

 Presents the participating institutions & their collections

 Supports hierarchical navigation

- **User friendly administration web GUI**
for easy management of providers and ingestion workflows

Challenges for aggregators

Improve searchability

Multiple ways for discovering content

Multilingual search / navigation

Advanced search / filters on results

Homogenization and classification of content

Increase the size of the aggregated content

Automatic validation

User friendly administration environment

Automatic ingestion workflows

Automatic enrichment/classification

Challenges for aggregators

SeachCulture.gr

deals with this problem using **two strategies**:

EKT has set specific requirements against which it validates and certifies the aggregated content using **Validator**

EKT using **Semantics.gr** enriches and homogenizes the aggregated content with respect to **dc:type** against a hierarchical bilingual vocabulary of types

Metadata records are enriched with a separated field '**EKT Type**' that holds references to terms of the vocabulary

Ephorate of Antiquities of Chania – Archaeological Museum of Chania
<http://www.chaniamuseum.culture.gr/>

The Archaeological Museum of Chania is subject to the Ephorate of Antiquities of Chania. It was founded in the early 20th century. Its purpose is the preservation, protection and promotion of cultural heritage of the area and includes exhibits from the Neolithic era (4th millennium BC) up to the Roman period (3rd century AD.).

repository

explore collection content in SC } **Repository of Archaeological Museum of Chania – Digitized items database**
<http://chaniamuseum.culture.gr>

The Portal of the Archaeological Museum of Chania provides access to digital collections and particularly to 614 items of the permanent exhibition distributed in 18 individual categories according to their type (Vessels - utensils, sculptures - reliefs, mosaics , inscriptions, coins, jewelry - gems, Others, figurines, miniature, clay tablets - seals, weapons - tools . In addition, eight of the above categories are presenting their objects in 3D application. Each object has been scientifically documented and the information concerning it are contained (data source, description, date, bibliographic reference). There are also photos or 3D presentations that allow an interactive rotation of the object. Finally, in the portal are educational programs, an entertainment platform, cultural routes and information about the opening hours and the activities of the Museum.

Baron Michael Tossizza Foundation
<http://metsovomuseum.gr/>

THE BARON MICHAEL TOSSIZZA FOUNDATION was founded in 1947 with the aim of maintaining Metsovo's cultural heritage and sustaining its economic growth. Today, the Foundation works to achieve the same goals as in the past, adjusted to Metsovo's modern needs and conditions. The foundation remains focused on the Tossizza Cheese Factory, the Ski Resort, the Metsovo Folk Art Museum, Aghios Nikolaos Monastery and the Student House in Athens for students from Epirus, as well as on more recent initiatives, such as the Children's Library, the

EKT types

EKT enriches and homogenizes the aggregated content against a hierarchical bilingual [Vocabulary of Types](#) that has created. Metadata records are enriched with a separated field 'EKT Type' that holds references to terms of the vocabulary. Therefore, the content of SearchCulture.gr is been classified to a compact and balanced set of types which gives it semantic cohesion and improves its searchability, presentation and multilingualism.

Semantic
enrichment

- **SearchCulture.gr** collections are registered in Semantics.gr
- Per collection, for metadata field **dc:type**, the tool allows the user to map **all the distinct values to terms of the EKT Types Vocabulary**
 - automatic OAI-PMH **harvesting** of distinct values
 - **automatic mapping** attempt based on string matching
 - a **secondary field** may be used for more precise mapping
- The tool improves the automatic suggestion effectiveness based on previous experience
- After the mapping is done, **SearchCulture.gr** enriches the collection according to the mapping rules.
